WOODY PET Litter & Bedding

A Superior Cat Litter - safe for kittens and de-clawed cats. Superior Litter & Bedding for all pets including birds, reptiles, gerbils, mice and guinea pigs etc.

1 lb. absorbs approx. 4 lbs. of odor causing liquid

long lasting

In cat litter boxes, WOODY PET absorbs more odor causing liquids and lasts longer. Cat owners have said, "Scooping the solids daily, we only replace the litter every 14 days and there is NO ODOR."

odor control

In horse and farm stalls WOODY PET eliminates ammonia odor, keeps floors drier longer with easier, faster cleaning and much less disposal, as well as much faster decomposition after use.

In small animal cages or pens, WOODY PET draws odor causing liquids from the bottom to ensure a stable, dry environment at all times.

In bird cages, WOODY PET provides added convenience, resisting clumping and caking, making cleaning quick and easy. The high absorbency rate will keep the cage fresh and odor free.

In reptile cages, WOODY PET provides a superb natural surface for all manner of reptiles. The absorbent characteristics make it a superior substrate for snakes, lizards and spiders. WOODY PET will not produce dust which can block and inflame sensitive breathing and sensing organs.

absorbency

Absorbency is the most important factor in odor control. Amazingly, one pound of WOODY PET will absorb four pounds of odor causing liquid. Plus, the natural wood oils and resins are ANTI-MICROBIAL and inhibit the growth of odor causing bacteria, keeping all areas fresh and clean smelling for longer periods.

economical

Because of the high compaction, WOODY PET has up to 400% more volume and will absorb up to 6 times more than most other litter and bedding products, making WOODY PET more economical for the consumer.

biodegradable

WOODY PET is a 100% biodegradable all natural wood fibre product. It decomposes quickly and may be composted or flushed.
