

WOODY PET™

Professional Hoof Oil

Revolutionary Professional Hoof Oil!

5 Trainers in last year's Breeder's Cup use this new product!

Woody Pet Professional Hoof Oil was developed by a trainer that wanted a Hoof Oil that solved hoof problems in a much shorter time frame than other products. This super-penetrating oil goes right into the hoof immediately and leaves no greasy, wax build-up. Ideal for dry or cracked hooves. Farriers love Woody Pet Professional Hoof Oil because it thickens and strengthens the hoof wall. And, once the horseshoes are on, they stay on!

Application Instructions

Apply with a brush daily to the entire hoof, top and bottom, until the hoof becomes exactly the way you want it to be. Then, use only as needed once, twice or three times a week.

WOODY PET™

Horse Stall Deodorizer

Eliminating Odors Keeps Everyone Healthy & Happy!

Horse Stalls

1. Sprinkle 3-5 cups over the entire stall floor using a little heavier concentration in the wet spot areas.
2. Remove the wet spots and sprinkle some more where the wet spots were.
3. When stripping the stall remove and discard with the bedding. This product will control the heat in your compost pile, and if used as mulch in planting areas will act as fertilizer by adding nitrogen from the slowly released ammonia odor.

Cat Litter Trays Sprinkle about 1/3 of a cup over the top of the cat litter. Because our product is odorless your cat will continue using the litter box but the offensive odors will be eliminated. Discard with used litter and repeat.

Small Animals Rabbits, Guinea Pigs, Gerbils, Mice, Rats, etc.: Sprinkle on the bottom of the cage or catch pan. Odors will be eliminated. Clean up and discard as odors reappear and replace.

Poultry, Bird Cages & Aviaries Sprinkling over the bedding in poultry barns, chicken coop floors, and on the bottom of aviaries, bird cages and under roosting areas will eliminate odors. When odors reappear, discard and replace or add more. This all natural safe product will not harm young birds or eggs.

Reptiles, Snakes It is recommended to put a pile in the corner of cages for animals that require their skin to be moist. Spread over the floor for animals that are not susceptible to drying of the skin. Clean out and replace when odors reappear.

Other Household Uses Sprinkle over all areas where any kind of odor is a problem, including urine, defecation, pet mistakes, even dried up areas. Leave until the odor disappears. Vacuum or sweep up. The granules will work on all types of carpets, flooring, fabrics and furniture, including automobile seats and carpets.

Contains 100% Clinoptilolite, a Natural Mineral which is Safe for All Animals and Humans!

We offer the best price, the best product and the best customer service! So, go ahead. Start pampering your horses today with the world's finest animal bedding and save money at the same time! Your horses are worth it!

The Quicker Picker Stall Fork

Woody Pet Quicker Picker Stall Forks are the ideal manure & bedding sifting tools designed to be used with our Professional Animal Bedding as well as all other Pelleted & Sawdust Bedding materials. The 30 tines are only 5/16 of an inch apart witch allows you to sift out the smaller pieces of manure, even smaller than marbles, resulting in much cleaner stalls in record cleaning time.

- Closer tines sifts out smaller manure pieces in less cleaning time
- Angled basket means easier faster sifting
- Polycarbonate basket resists breakage
- A Stall Walkers & Miniature Horse owners dream
- Cleaner stalls with faster pickin' time means more ridin' time!

WOODY PET Equine Comfort Mattress Stall Flooring System

Unsurpassed Comfort Improves Performance Ability, Speeds Up Injury Recovery Time!

Pays for itself in less than 1 year! Providing the comfort needed, eliminates the need for bedding! Minimal bedding is required solely to soak up urine. This results in a saving of 80% on bedding costs!

Benefits for your horse... The non-slip, water proof top cover eases laying down and rising, eliminating hock sores. Horses spend more time laying down. Less leg fatigue reduces tissue fluid, increasing performance ability. 80% less bedding needed means 80% less dust. 1/4 injury recovery time. Older horses now prance out of the stall instead of limping. Perfect Foaling Stall!

Easy Installation! Equine Comfort Mattresses can be installed over any type of surface. All that is needed is a sharp knife and a power screwdriver. We supply a Free Installation Video. On average, installation takes approximately two hours per stall.
