

WOODY PET[®]

All Purpose Litter & Bedding

BEST CAT LITTER

Woody Pet Professional Animal Bedding also works as a Superior Cat Litter which is safe for kittens and declawed cats. In cat litter boxes, Woody Pet absorbs more odor causing liquids and lasts longer. Cat owners have said "Scooping the solids daily, we only replace the litter every two to three weeks and there is NO ODOR!"

BEST BEDDING FOR SMALL ANIMALS

In small animal cages, Woody Pet draws odor causing liquids from the bottom to ensure a stable, dry, odor free, healthier environment.

BEST FOR YOUNG BIRDS

In bird cages, Woody Pet provides added convenience, resisting clumping and caking, making cleaning quick and easy. The high absorbency will keep the cage fresh and odor free. Woody Pet is safe for young chicks and will not harm eggs.

BEST BEDDING BECAUSE IT IS SAFE

Woody Pet Professional Animal Bedding is the best non-toxic alternative to wood shavings because there are no dangerous hydrocarbons like there are in pine and cedar wood shavings.

ABSORBENCY MAKES IT THE BEST

Absorbency is the most important factor in odor control. Amazingly, just one pound of Woody Pet will absorb four pounds of odor causing liquid, locking in the odor causing bacteria, keeping all areas fresh and clean smelling for longer periods.

THE BEST PRODUCT

Raw White Soft Wood Shavings and Sawdust undergo extreme processing which extracts most of the resins, oils, tars, acids and water from the wood fiber. Exiting the milling process, the product is completely sterile in granulated form and has become an extreme absorbent. Looks like, but does not taste like Granola. We have eliminated the dangerous aromatic hydrocarbons. There are no additives of any kind in this product and it is 100% biodegradable.
