Our satisfied customers include some of the most prestigious race tracks, ranches, farms, professional stables and equestrian centres around the world. And, we *guarantee* the best price, the best product and the best customer service! So, go ahead. Start pampering your horses with the world's finest animal bedding and save money at the same time!

The **Best** Bedding!
The **Best** Stall-Flooring!
The **Best** Fork!
The **Best** Deodorizer!

Woody Pet Equine Comfort Mattress Stall Flooring System

Unsurpassed Horse Comfort with remedial, therapeutic flooring for your horse while standing and a comfortable, even surface when lying down, decreasing injury rehabilitation time and aiding in loosening stiff joints. The non-slip surface provides ease for lying down and rising, eliminating hock sores. The wall-to-wall Non-Draining Top Cover keeps the dirt and bedding on the surface for easy removal. Horses can't get at the base to dig which eliminates pawing and drastically reduces stall maintenance.

Why do the pros pick this fork for pickin'?

- Because it's designed for pelleted & sawdust bedding!
- 30 tines, not only 18 as on the other guy's.
- Gets the small stuff from 5/16" and larger.
- Great for stall walkers.
- Angled basket works larger volumes.
- Polycarbonate design resists breakage.
- Cleaner stalls with faster pickin' time means more ridin' time!

Woody Pet Stall Deodorizer

**Eliminating Odors Keeps
Everyone Healthy & Happy!**

Horse Stalls

1. Sprinkle 3-5 cups over the entire stall floor using a little heavier concentration in the wet spot areas.
2. Remove the wet spots and sprinkle some more where the wet spots were.
3. When stripping the stall remove and discard with the bedding. This product if used as mulch in planting areas will act as fertilizer by adding nitrogen from the slowly released ammonia odor.
